

Student of the Month – October 2015 North Area

Weston Roberson, Metal Fabrication Tippah Career and Technology Center

Instructor's Name: Steve McKee
Current GPA: 4.0
Attendance: Excellent

Weston Roberson, a senior, will be a two-year completer in Metal Fabrication at Tippah Career and Technology Center in Ripley, MS this school year. Weston had a 4.0 grade point average last year in this class and has maintained that GPA this year. Weston's attendance and work ethic is always excellent. He is willing to assist any of the first year students in the metal fabrication shop and help them be successful with their projects. Weston has great rapport with everyone he comes in contact with. People are often drawn to him because of his magnetic personality.

Weston had the highest score last year in Metal Fabrication program on the MS-CPAS2 test. He plans to attend Northeast MS Community College and continue his education in the tool and die program and obtain a certification in welding. Weston is a member of Skills USA, National Technical Honor Society, and maintains part time employment at a fabrication shop rebuilding vehicles and welding. He always contributes to the Leukemia/Lymphoma Society Pennies for Patients charity drive at our center. When I look at a student that represents technical and industry education, I see a student like Weston, who maintains excellence in every project he starts, whether in the classroom or in the shop. He takes pride in everything he does.
